# Self-service data preparation

Tableau Prep changes the way traditional data prep is performed in an organization. By providing a visual and direct way to combine, shape and clean data, Tableau Prep makes it easier for analysts and business users to start their analysis, faster.

Tableau Prep is comprised of two products: **Tableau Prep Builder** for building your data flows, and **Tableau Prep Conductor** for scheduling, monitoring and managing flows across the organization.

The screenshot displays the Tableau Prep Builder interface. The top section shows a visual data flow diagram. On the left, under 'Connections', are data sources: Orders (East), Orders (West), Orders (Central), Orders (South), and Returns (All). These feed into a central 'All Orders' node. This node then feeds into 'Orders + Returns', which leads to 'Split Customer'. 'Split Customer' branches into 'Create All Order...' and 'Aggregate'. 'Aggregate' leads to 'Quota + Orders', which finally leads to 'Create Annual...'. The bottom section shows the 'Create Annual Performance' flow with 9 fields. It includes options to 'Publish output as a data source' (Save to file or Publish as a data source) and a 'Run Flow' button. A preview table is shown below the flow.

Discount	Year of Sale	Quota	Year	Region-1	Region	Profit	Quantity	Sales
0.2649356223176	2,015	100,000	2,015	Central	Central	539.5533999999997	1,726	103,838.16459999986
